Professor Amitesh is very encouraging and always there to guide you to your full potential in math. He provides very detailed and helpful information for every completed question which has immensely helped me improve and do well in this course.

Amitesh absolutely made MAT 100 the experience that it is. I cannot suggest any way that he can do better. He is an absolute gem at teaching.

The math course would not be the same without Professor Amitesh. I had trouble understanding certain math concepts but Professor Amitesh was always there to help when needed and describes it in a way that not only allows me to understand the material, but master it as well.

Take it — see if you can get A. Datta as your instructor — he is the best math teacher I think I've ever had and made the course really stimulating.

I highly recommend a student of any math level to take this course. Even if you do not feel confident going into math, Professor Amitesh will always help you every step of the way. His encouragement has definitely motivated me to do well and I absolutely loved attending his classes and precept.

Amitesh was absolutely amazing. He may be extremely fast at teaching near the start, but he will adjust depending on the class' level! He is so helpful and is willing to support you as long as you communicate you want help to him!

Professor Amitesh made me think outside of the box when solving challenging math questions in a creative way, which I strongly believe allowed me to input my knowledge into other problems as well and made me feel confident in the course.

If you are looking to better your math skills and feel unprepared for MAT 103, please take this class. It is absolutely worth it and will make you think differently about the foundations of math. If Amitesh is teaching, absolutely take it with him. He is by far the best and most helpful professor I have found at this school. He is very understanding and kind too! He will make the experience enjoyable for you!

Professor Amitesh is a legend. Great person, always willing to help, very understanding and also knows what he's talking about.

The recorded videos that Professor Amitesh provided in the modules has really helped me, especially when there were days that I was not able to attend. I am very grateful for everything Professor Amitesh has done for us and how supportive he has been.
