Big thank you to Professor Datta! I can honestly say that he truly cares about his students in such a unique way. When I was in his class, I felt that he didn't only care about us as students but cared about us as actual people.

Even though I was perpetually tired during my 8:30am classes, Amitesh would always brighten my day by greeting me in the morning. He is not only a FABULOUS professor but also an EXTREMELY caring person... and that really means the world. If you have to take this course, try to join Amitesh's class because you WILL truly understand the material. He takes careful care during class to ensure that you are learning. He will adjust to the pace of each student and really knows how to teach. I cannot recommend Amitesh Datta enough!! SUCH AN AMAZING PROFESSOR AND PERSON!!! :)

My instructor was excellent. He was very passionate and engaged with the students. He encouraged all of the students to participate and was very responsive to students' questions. He also actively asked for our feedback in order to improve the course.

Highly responsive and helpful teacher. Not only did he show care for his students, but he gave a lot of his time to make sure that we succeeded.

If you wanna take this class, take it with DATTA. He is amazing and will actually make this class enjoyable. He will also be a great help for homework. He is kind and friendly and one of the only reasons I had some faith that I would do well in this course. Overall, know that this class is a lot of work and will be a commitment. It is not easy, but practice a lot.

In all honesty, I am not the best when it comes to math and did not expect to do well in this class, especially without a calculator. However, when I met Amitesh and saw the effort that he puts into the class and the dedication he has to his students, I knew that calculus would not be as difficult as I thought. He is an amazing professor and as an instructor, works tirelessly to make sure that we feel confident in our mathematical abilities. He grew my understanding of calculus, but also took the time to get to know each of his students. His care for his work is evident not only in the statistics of how well his students do but also in the growth many of us make. I honestly looked forward to class because I knew that he would truly develop my understanding of calculus. He is communicative and gives us extra practice problems during the lecture to extend our applicative abilities. I am so grateful to have gotten to know Amitesh as he honestly is an amazing teacher and helped me develop my knowledge of calculus immensely.

Amitesh was a wonderful lecturer. It was clear that he not only cared about the course material, but about his students as well.

My instructor, Amitesh Datta, was amazing. He explains the concepts in a way that stimulates curiosity and engages the students, gives us additional challenging problems that deepen our understanding and make us think. He always makes sure that all of us understand everything, and he was giving additional office hours to clarify course material that was hard to grasp for some of us and to answer our questions. He was always looking for feedback from us and for opinion on how we feel about the pace of the class and whether we would feel better if something changes.

Professor Datta has been one of the best instructors I've encountered so far. Professor Datta shows genuine interest in both mathematics and his students, ensuring both interaction and activity within class.

Amitesh was a great lecturer, and all the students could tell that he genuinely wanted the best for his students. He always gave us extra problems to solve for practice and held extra review sessions.

I always felt very prepared for the EPs, Psets, and exams. If I had any concerns, Professor Amitesh would always be sure to address them during office hours. He also took time out of his evening to hold and record review sessions before exams so that we could be as prepared as possible!

Try and get into Amitesh's class. nothing else to be said.

For those that need to take calculus, this class should prove to be good and easy enough to pass. Students that have a calculus background should find this class low–medium difficulty since tests often contain more abstract methods of thought. I had A. Datta as my teacher, and he was the best. Very caring of his students, and always ready to help. If he is available as a classroom teacher, get him – especially if you know you aren't the greatest at Calc. Trust me, he'll help you learn the material and succeed (granted that you also study, of course).

Instructor was always extremely helpful with psets and ep questions without feeding us answers, always guided us towards the answers and gave us motivational speeches to ensure we felt confident prior to tests

If you can, try to get Amitesh as a lecturer. He truly cares about his students and is genuinely very kind and knowledgeable!

Professor Datta presented the material wonderfully. His presentations were very clear and logical. They were not random and aimless; he taught the course material very meticulously and logically in a way that was easy to understand and made sense to us students.

Great course, especially if taught by Professor Amitesh Datta. (Seriously, take it with him!!) Do all of the PSETs and assignments if you can, as those will really help you understand the material.

Absolutely amazing. Professor Datta was supportive patient and always willing to go back over the same content over and over again until the entire class understood it.

I absolutely loved taking Amitesh's class – he constantly tries to engage your interest with the material by asking you critical thinking questions. He doesn't want to just give you the answer, but wants to make sure you understand why. He also cares so much about every individual student and checks in with you if things aren't going as well as you would have wanted during the semester. He answers every and all questions, so if you're confused – ASK AWAY.

AMITESH IS THE GOAT

This class was absolutely amazing. I was never confused as Amitesh always explained everything and I think had I had another lecturer, I would have failed.

Amitesh was a phenomenal professor. He cared about all of his students and engaged us every class. He did his very best to prepare us for all the tests, and he went out of his way to hold review sessions and help his students in any way he could. He also responded to students' opinions/criticisms by slowing down lectures.

The instructor was exceptional. I believe that should be the standard for all math professors, to be as encouraging and helpful as he was

Professor Datta's classes are amazing, he's very helpful and explains things very well.

Professor Amitesh was an exemplary instructor! He gave us a level of independence that helped us to develop our critical thinking skills while still walking us through examples in a way that cleared up any confusion. Despite this being an 8:30am course, I was constantly engaged with the material and encouraged to participate. Professor Amitesh also made sure to give us short breaks whenever we seemed tired and was always ensuring that our concerns were being addressed.

Amitesh's office hours are the best when it comes to asking questions – he answers all questions even if you just email him the question. He helps guide you to answer the problems in problem sets and EPs. It's incredibly helpful.

amitesh is the best try to get him

Professor Amitesh truly was wonderful and truly advanced the quality of the course as a whole. His care for students and ability to teach the material in an engaging way was amazing. T

Amitesh answered all of my questions, met with me one on one for multiple weeks straight for tutoring and incorporated our feedback about the class into his teaching. He spent hours hosting multiple extra review sessions for each test and plans on doing so over the reading period for our exam. He thoroughly explains the material and questions and makes sure that we feel comfortable when completing classwork, assignments, and examinations.

Lecture was extremely enjoyable with professor Datta. He made it an environment in which I felt comfortable to ask questions if anything was unclear to me. He was also extremely encouraging and helpful.

This instructor was AMAZING. I would highly highly recommend him. He was so dedicated and kind throughout the course and turn math, my least favorite subject, to one my favorite.

I cannot say thank you to Professor Datta enough. He never made me feel bad for not understanding a problem or concept. Professor Datta took the time to learn all of our names and he would encourage us to speak up during class, but he never made us feel uncomfortable if we didn't know how to answer a question. I felt that his course was never passive. I always felt that I was actively learning because of his class. What I absolutely loved about Professor Datta's class is that he definitely adjusted to our learning needs: he took it a bit slower for students who didn't fully understand the material but also provided more advanced problems for students who were ahead. He knew how to best equip all students with tools in class that we needed to learn. His teaching style is extremely clear and helpful.

If I ever had a question, I knew that Professor Datta would truly help me understand. I could honestly say that he wanted to see us succeed by taking the time to help us in class.

I'm not a big math person by nature, but Professor Datta made me happy to go to math class because he made the concepts interesting and applicable.
