I had an incredible experience having Professor Datta as my instructor for this course. He was always readily available to give help to any student who needed it, he showed genuine interest in his students' well-being, he was an excellent teacher of the material, and he encouraged participation from everyone. Professor Datta was one of the best instructors I have ever had, and it was a pleasure taking one of his classes. He not only has an excellent understanding of the material he is teaching, but he knows how to present it in a manner to students that we will understand. I always felt heard and cared about in this course.

Professor Datta is an amazing instructor. He does an excellent job at responding to raised questions, offering helpful course material, and encouraging participation. The instructor does an excellent job at preparing students for tests and introducing new topics. He attempts to pace the class in a way that allows for the agenda of the course to fit the needs of the students.

The classes were very high quality. The professor always made a point to explain subjects in various ways, as to help all students understand. He was very highly invested in seeing every single one of us achieve. He also always responded to questions clearly, and encouraged us to ask them often.

Professor Datta did a fantastic job teaching the material and was always eager to do extra review sessions

Professor Datta was excellent at helping us find the answers to the example problems without giving the answers away. I always felt ready to take the tests.

Professor Datta is very friendly and tried his best to help me in this course. He scheduled one on one conferences to check up on me and will call on you in class to try and get participation. He put review sessions and even dedicated some lectures to pure review days before exams.

Really enjoyed the course and the professor was excellent. Very engaging and helped prepare the students for exams and PSET

Prof. Datta made this course great. His effort and enthusiasm was incredible.

The quality of the classes was excellent. It was a perfect combination of lecture and practice problems. Participation was highly encouraged and this added to my learning.

Professor Datta does an amazing job preparing students for EPS and PSETS. His office hours are also a great opportunity to ask any additional questions or refer to for additional guidance.

He was consistently stimulating my thinking in class and prepared me extraordinarily well for the exams and problem sets. An all around top-tier instructor.

Take this course! Professor Datta is particularly effective. Despite not being a math major, I enjoyed this course.

If you're going to take this class, definitely try to get Professor Amitesh Datta. He is incredibly kind and very good at explaining concepts. I thought the course was manageable and pretty good. If you have taken calc ab in high school, you should be perfectly fine. If not, you might have to put a little more work in but definitely doable. The math department is also quite kind and generous when grading (dropping lowest exam score, EP, etc). You'll be fine, don't worry.

Professor Amitesh is a great professor he ensured that all students remained engaged throughout the lecture and thoroughly understood all math concepts deeply. He is a genuinely caring professor who cared for each of his students with a passion and took it upon himself to ensure that all students were understanding concepts and was willing to help students in any way necessary.

Amazing. He's very caring, very understanding, and truly wants his students to do well.

GET AMITESH! He is simply amazing. Caring, humble, kind, he truly wants the best for all of his students and it very much shows, both in the way he interacts with us, and also in the scores that his students receive. I think something like 70% of the entire MAT103 course's A's came from this class. I've heard of professors in this course who put their back to students the whole time, professors who don't answer questions, etc, so make sure you take careful consideration when picking a professor, because it makes a world of a difference.

If you are able to take this course with Professor Datta, I would highly recommend this course. I had always struggled with math in high school, but am leaving this course feeling I have a strong understanding of calculus. Professor Datta makes sure that all of his students are feeling confident in themselves and does his absolute best to ensure all of his classes are doing well. He is a rare professor to come by who shows true care for his students. I've heard from other sections that this was not an enjoyable course.
